Physician.

The Saviour's Cures Always the Most Wonderful-A Physician Whose Treatment Was Without Money or Price-Final Gathering of the Saved.

In a late sermon at Brooklyn Rev. T. DeWitt Talmage discoursed on the profession of healing. His text was Matthew ii, 5: "The blind receive their sight, and the lame walk, the lepers are cleapsed, and the deaf hear." He said:

"Doctor," I said to a distinguished Burgeon, "do you not get worn out with constantly seeing so many wounds and broken bones and distortions of the human body?" "O, no," he answered, "all that is overcome by my joy in curing them." A sublimer or more merciful art never came down from Heaven than the art of surgery. Catastrophe and disease entered the earth so early that one of the first wants of the world was a doctor. Our crippled and agonized human race called for surgeon and family physician for many years before they came. The first surgeons who answered this call were ministers of religion, namely, the Egyptian priests. And what a grand thing if all clergymen were also doctors, all D. D.'s were M. D.'s, for there are so many cases where body and soul need treatment at the same time, consolation and medicine, theology and therapeutics. As the first surgeons of the world were also ministers of religion, may these two professions always be in full sympathy! But under what disadvantages the early surgeons worked, from the fact that the dissection of the human body was forbidden, first by the pagans and then by the early Christians! Apes, being the brutes most like the human race, were dissected, but no human body might be unfolded for physiological and anatomical exploration, and the surgeon had to guess what was inside the temple by looking at the outside of it. If they city, as was Archagathus, because of his bo'd but unsuccessful attempt to save a

But the world from the very beginning kept calling for surgeons, and their first skill is spoken of in Genesis, where they employed their art for the incision of a sacred rite, God making surgery the predecessor of baptism; and we see it again in II. Kings, where Azahiah, the monarch, stepped on some cracked latfloor, and he was so hurt that he sent to dead lift! A Surgeon who never loses a synagogue? They would have paid Him Confederate General's headquarters and rear, and I noticed that many were crysurgery that he was deified, and temples were built for his worship at Pergamos.

What mighty progress in the baffling of disease since the crippled and sick of ancient cities were laid along the streets, that people who had ever been hurt or disordered in the same way might suggest what had better be done for the patients; and the priests of olden time, who were constantly suffering from colds received in walking barefoot over the temple pavements, had to prescribe for themselves, and fractures were considered so far beyond all human cure that instead of calling in the surgeons the people only invoked the gods! But notwithstanding all the surgical and medical skill of the world, with what tenacity the old diseases hang on to the human race, and most of them are thousands of years old, and in our Bibles we read of them; the carbuncles of Job and Hezekiah; the palpitation of the heart spoken of in Deuteronomy; the sunstroke of a child carried from the fields of Shunem, crying: "My head! my head!" King Asa's disease of the feet, which was nothing but gout; defection of teeth, which called for dental surgery, the skill of which, quite equal to any thing modern, is still seen in the filled molars of the unrolled Egyptian mummies; the ophthalmia caused by the juice of the newly ripe fig, leaving the people blind at the roadside; epilepsy, as in the case of the young man often falling into the fire, and oft into the water; hypochondria, as self an ox and going out to the fields to

The world has never seen but one surgeon who could straighten the crookstruct the drum of a soundless ear, or grandest, gentlest and most sympathetthe earth and hallelujahs of all Heaven. "The blind receive their sight, and the lame walk: the lepers are cleansed, and the deaf hear."

I notice this surgeon had a fondness he has had a patient brought to him, has five years ago? You bring him to me after all power of recuperation is gone. You have waited until there is a complete contraction of the muscles and false ligatures are formed and ossification has taken place. It ought to have the Surgeon seemed to prefer inveterate cases. One was a hemorrhage of twelve years and He stopped it. Another was a curvature of eighteen years and He mid noon. straightened it Another was a cripple of But this Surgeon was just as wondercall a convention of all the surgeons of side of you when they sit, or walk or it is, humanly speaking, incurable. Yet ears at all. Most wonderful instrument the world!" That is the Surgeon of all It is a grand stake the soldier plays THE annual report of the Assistant this divine Surgeon put both His hands is the human car.
